- 15 Jake is going to make a path from small paving stones and large paving stones. The diagram shows Jake's design for the path. The rest of the path is made using the same pattern of paving stones.

A small paving stone costs £2.30
A large paving stone costs £3.65

Jake needs to buy enough paving stones to make a path that is 6 metres long.

- (a) How much will Jake have to pay for the paving stones he needs?

$$6 \div 1.5 = 4$$

Small $4 \times 10 = 40$ slabs
 $40 \times 2.3 = \pounds 92$

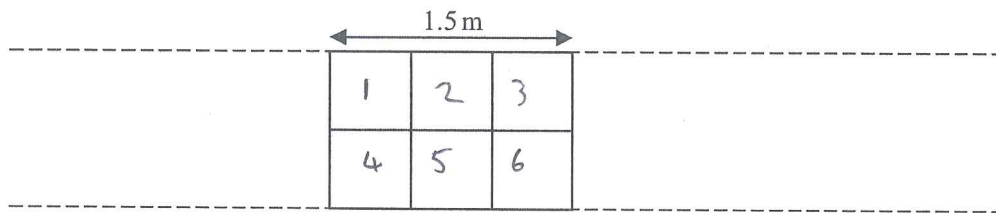

Large $4 \times 3 = 12$ slabs
 $12 \times 3.65 = \pounds 43.8$

Total $92 + 43.8 = \pounds 135.80$
